

DILATION

Dilation is the widening of the pupils by use of medicated eye drops. This allows a better view of the retina and helps the doctor to detect conditions that may be missed during a routine eye exam. Dilation is strongly recommended for patients with a HISTORY OF CATARACTS, HIGH BLOOD PRESSURE, HIGH GLASSES PRESCRIPTIONS, and/or OTHER OCULAR DISEASES. It is HIGHLY RECOMMENDED for ALL DIABETICS, PATIENTS WITH GLAUCOMA, and CHILDREN 12 AND UNDER. After being dilated, you may experience blurred vision at near and light sensitivity. We will provide a pair of disposable sunglasses for your comfort.

There is no additional charge for dilation.

- Yes, I would like to have it done today.
- Yes, but I would like to reschedule for another day.
- No, I do not want to be dilated.

Please sign here if you do NOT want dilation: _____

VISUAL FIELD SCREENING

A new and highly sophisticated computerized instrument now enables us to provide a more thorough visual field screening. This instrument checks for loss of sight, both in central and peripheral areas. Visual Field Testing can assist us in early detection of glaucoma, retinal problems, some neurological diseases (such as brain tumors and optic nerve disease), and enable us to better diagnose causes of headaches.

The fee for this test is \$15

Please check one and sign below:

- I do consent to having the Visual Fields Test performed.

- I do not wish to have it performed at this time. I do understand the importance of Visual Fields Testing and I release Woodbridge Eye Care from any liability related to the failure to treat or diagnose any eye conditions due to the lack of diagnosis information, which could have been obtained by this test.
